EXAMINER'S AMENDMENT

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 16 and 17, drawn to a gas mixture, classified in class 252.
- II. Claims 18 and 19, drawn to a method of minimizing heat retention and inflating a tire, classified in class 141, subclass 9.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as one that doesn't require inflating tires.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with John R. Wahl on 1/8/08 a provisional election was made without traverse to prosecute the invention of Group II, claims 18 and 19. Affirmation of this election must be made by applicant in replying to this Office action. Claims 16 and 17 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

This application is in condition for allowance except for the presence of claims 16 and 17. Accordingly, claims 16 and 17 have been cancelled by an Examiner's Amendment presented below.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John R. Wahl on 1/8/07.

The application has been amended as follows:

Cancel Claims 16 and 17.

The following is an examiner's statement of reasons for allowance: None of the prior art of record, alone or in combination, teaches a method of minimizing heat retention in a gas within a tire rotating on a surface by inflating a tire with a gas mixture comprising carbon dioxide and a hydrofluorocarbon mixture, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
